

THE BRYDEN CENTRE

OFFICIAL NEWSLETTER OF THE BRYDEN CENTRE

Update from the Bryden Centre staff

As of November, we would like to welcome our new Finance Manager, Naomi Boyd!

If you wish to contact her, please do so via email at N.Boyd@qub.ac.uk or telephone at **02890976505**.

Naomi has been previously working at Queen's University in the Research Finance department, and is looking forward to joining us in the Bryden Centre!

In terms of social media, the Bryden Centre is gaining some momentum on all 3 main channels, however if you have not yet liked/followed us, click on the links below!

An Eventful 2018

We are almost in a new year at the Bryden Centre, and we have accomplished a lot this year!

We have now successfully recruited 29 students across the consortium between 2017 and 2018, with our last recruits starting this December.

If you wish to see all of our students and their projects, head over to our website: <https://www.brydencentre.com/> and click "Downloads".

Our research focuses on harnessing the power of the sea, cultivating the power of the land, and working with the environment.

As part of our constant dissemination efforts to promote the Bryden Centre and its innovations, our team has been seen exhibiting at or attending several events in this last half of 2018.

You might have seen us there:

- Science & Stormont, Oct 18, Belfast
- Ocean Energy Europe, Oct 18, Edinburgh
- Future of Biogas, Nov 18, London
- CASE Researchers Forum, Nov 18, Belfast
- International Tidal Energy Summit - Nov 18, London

Our 2019 event calendar is currently being reviewed, and we will advertise our future exhibitions on our website under "Events."

It's not about ideas. It's about making ideas happen.

Bryden Centre's future leaders...

As mentioned before, we now have 29 students on board the Bryden Centre ship!

Our first cohort of students and some of our second cohort partook in the first summer school this past September at Queen's University Belfast.

This summer school started with a 3-day Micro-MBA programme, delivered by the William J Clinton Leadership Institute, encompassing some decision-making exercises, negotiation skills, and a project presentation. Their 4th day was spent visiting Queen's Marine Laboratory in Portaferry and the agriAD plant in Banbridge, whilst their 5th and final day involved a Student Council meeting.
